EDUCATION

Michigan State University

Aug 2022 – May 2026

Bachelor of Science in Computer Science, Minor in Data Science, GPA: 3.87/4.0

East Lansing, MI

- **Honors College with Honors College Excellence Scholarship; Dean's List**
- **Relevant Coursework:** Data Structures · Algorithms · Databases · Computer Systems
- **Community Involvement:** [Imagine Software Club at MSU](#)

EXPERIENCE

Software Developer, Contractor

Sep 2025 – Dec 2025

United Wholesale Mortgage / BS Capstone

Pontiac, MI

- Developed an internal KPI dashboard backed by .NET services and data from multiple reporting sources, reducing status-report preparation time by **70%**.
- Built reusable React components for role-based views, drill-down workflows, and analytics visualizations that helped teams identify trends and outliers faster.
- Added trends, variance, and forecast visualizations, cutting Q&A time in KPI meetings **from approx. 20 to approx. 10 minutes**.
- Wrote unit/component tests using Vitest and React Testing Library, improving reliability and reducing regressions during iteration.
- Collaborated with internal stakeholders to refine requirements, resolve issues, and deliver iterative improvements to the dashboard.

Software Developer

Jan 2025 – May 2025

[Imagine Software](#) / Client: AppAware

East Lansing, MI

- Collaborated with a student development team to build the mobile UI for AppAware, a digital wellness app focused on helping users understand and improve phone usage habits.
- Developed React Native interface screens for the app's prototype, including dashboard views for user intention score and phone-usage insights.

Artificial Intelligence Engineer

Sep 2023 – Dec 2023

[Imagine Software](#) / Client: YouLearn.AI

East Lansing, MI

- Built a Streamlit-based application that generated adaptive curriculum flows in real time based on user topic selection and learning progress.
- Integrated LLaMA, GPT, and LangChain into a virtual teaching assistant platform that supported educational experiences for **over 1,000,000 users**.

PROJECTS

Testronaut | [GitHub](#) | [PyPI](#) | *Node.js, Python*

- **Won a 2nd Place Overall** at Oakland University's hackathon, GrizzHacks 7.
- Developed a Node.js CLI tool with a Python back end that uses Gemini to generate test cases, refactor code, measure program performance, and improve CI/CD workflows, increasing development efficiency.
- Evaluated generated tests on a curated benchmark and manually verified functional correctness; improved correct test generation to **83%** through prompt and context-tuning.

Jester.io | [GitHub](#) | *FlutterFlow*

- Built an experimental cross-platform mobile application that transformed lecture material into short-form educational video clips to improve engagement and retention.
- Integrated transcription, summarization, and voice-processing features to improve accessibility and content delivery.

SKILLS & TECHNOLOGIES

Languages: Python, JavaScript, TypeScript, SQL, C#, HTML, CSS

Frameworks / Libraries: React, pandas, NumPy, Matplotlib

Systems / Engineering Tools: Linux/Unix, SSH, Jupyter Notebook, Vim, Zed, Claude Code, Codex, GPT

Testing / Development Tools: Vitest, React Testing Library, Git

Core: Debugging, Object-Oriented Programming, Front-End Development, Data Visualization
